Hyperspectral Image Analysis:

高光谱遥感分析

Course introduction

Jun Li (李军)

School of Geography and Planning
Sun Yat-Sen University, Guangzhou, China
Mobile: 13922375250; Office: D307

E-mail: lijun48@mail.sysu.edu.cn; Webpage: <http://www.lx.it.pt/~jun/>

Keynotes (关键词)

1. 就业：高光谱已经迈入民用阶段，工作机会越来越多
2. 考研：专业选择、科研经历（面试重点）
3. 出国：推荐信、绩点、英文成绩、科研经历、知识
4. 高光谱分析的特点（与其他课程的区别）
5. 其他遥感分析的特点
6. 多元统计分析的特点：最新手段和方法
7. 国内外课程的区别（冰岛大学讲课经历）
8. 课程理念：全面、丰富，遥感发展的最新阶段
9. 讨论

Hyperspectral (高光谱)

SpaRTaN

Sparse Representations and Compressed Sensing Training Network

Navigation: [About](#) [Recruitment](#) [Partners](#) [Contact](#)

NEWS: Looking for a PhD studentship? We're starting to recruit for our Early Stage Researchers, details on our [recruitment page](#)

The SpaRTaN Initial Training Network will train a new generation of interdisciplinary researchers in sparse representations and compressed sensing, contributing to Europe's leading role in scientific innovation.

By bringing together leading academic and industry groups with expertise in sparse representations, compressed sensing, machine learning and optimisation, and with an interest in applications such as hyperspectral imaging, audio signal processing and video analytics, this project will create an interdisciplinary, trans-national and inter-sectorial training network to enhance mobility and training of researchers in this area.

SpaRTaN is funded under the FP7-PEOPLE-2013-ITN call and is part of the Marie Curie Actions — Initial Training Networks (ITN) funding scheme: Project number - 607290

Full Partners

- Noiseless Imaging (FI)
- UEdin (UK)
- Surrey* (UK)
- INRIA (FR)
- EPFL (CH)
- VisioSafe (CH)
- IT (PT)

Associate Partners

- TUT (FI)
- CEDAR (UK)
- Fraunhofer (DE)

Geography Teacher Training

Prof. Dr. Devis Tuia

SNSF Professor, Head of Unit

Multimodal Remote Sensing
Department of Geography
University of Zurich - Irchel
Winterthurerstr. 190
CH-8057 Zurich, Switzerland

room: Y25 J 68

email: [➔ devis.tuia@geo.uzh.ch](mailto:devis.tuia@geo.uzh.ch)

tel: +41-44-635 52 60

fax: +41-44-635 68 41

Research interests

- Earth Observation
- Data fusion
- Machine learning, pattern recognition
- Interactive models
- Land use / land cover classification
- Vegetation parameters retrieval
- Imaging spectroscopy
- Very high resolution imaging
- LIDAR

个人详细介绍:

个人主页, [google学术](#)

一、研究方向: 高光谱图像分类、分割, 混合像元分解, LIDAR, Inverse Problem

二、学历背景

- 2007.9-2011.6 电气与计算机工程, University of Lisbon, 博士
- 2004.9-2007.6 摄影测量与遥感, 北京大学, 硕士
- 2000.9-2004.6 地理信息系统, 湖南师范大学, 本科

三、工作经历

- 2014.01- 中山大学教授, 博士生导师 (青年千人)
- 2011.06-2013.12 西班牙University of Extremadura, 博士后

四、学术论文

1. Z. Xue, J. Li, L. Cheng, and P. Du. SpectralSpatial Classification of Hyperspectral Image via Morphological Component Analysis Based Image Separation. IEEE TGRS, accepted, 2014

Course introduction (课程介绍)

- This course is intended to cover several different aspects related with the technology of **hyperspectral image analysis and interpretation** (高光谱图像分析和解译) .
- Attention will be given to both **theoretical aspects** and also to **implementation aspects** (理论和应用) , so that course participants can have a broad view and at the same time a specific view about some successful algorithms and case studies.
- The course will cover **two main topics** which have been very successful in hyperspectral image analysis:
 - 1.The first topic is related with **classification** (分类) , which assumes that the spectral response of each pixel is dominated by a main single substance.
 - 2.The second topic is related with **spectral unmixing** (混合像元分解) , which analyzes hyperspectral data taking into account the possibility that several materials are mixed within each individual pixel.

Course schedule (课程安排)

The course will last for a total of **17 weeks** in which both **theoretical and practical/discussion aspects** (理论知识和实验) will be covered.

The duration of **hyperspectral classification** will be around **5 weeks** (分类约为5周). Around **two invited session** will be included.

The duration of **spectral unmixing** will be around **6 weeks** (混合像元分解约为6周). Around **two invited session** will be included.

The **theoretical sessions** will be around 1 hour and 30 mins, while the **practical sessions and discussion** will be 1 hour. (理论课程约为1小时45分钟, 实验及讨论课约为30小时)

Final exam will be in the last week (最后一周考试).
