8-12 September, 2003

Call for Problems

ADVANCED SCHOOL AND WORKSHOP on Mathematical Techniques and Problems in Telecommunications

You are kindly invited to submit the text of a mathematical problem in the field of Telecommunications.

All submitted problems will be refereed, and accepted ones will be made available on the MTPT webpage asking for possible solutions. Accepted problems and their solutions (if any) will be presented and discussed in MTPT and included in the workshop proceedings.

Organizing Committee

Prof. Carlos Salema (Instituto Superior Técnico, IST), Prof. Joaquim Júdice (Universidade de Coimbra), Prof. Carlos Fernandes (IST), Prof. Mario Figueiredo (IST) and Dr. Luís Merca Fernandes (Instituto Politécnico de Tomar, IPT)

Submission Guidelines:

The text in English describing the mathematical problem in Telecommunications must be formatted according to the indications given at the Author Information page of MTPT website. A MS Word template and a sample document are available to download from this site, to help authors with text formatting. The text should explain clearly the context and the difficulty associated with the problem, so that the interested mathematicians have the necessary information to put forward a solution. Text is limited to 8 A4 pages, typed in double column, single spaced, 10-point Times New Roman or an equivalent font, according to the formatting defined in the template and the sample document.

Submissions should be made in electronic format by e-mail to:

carlos.fernandes@lx.it.pt

Acceptable electronic file formats include RTF, PDF and DOC.

Further details may be found at: <http://www.lx.it.pt/mtpt/>

Submission due: 31-Jan-2003
