

PIMRC 2002 THE 13TH IEEE INTERNATIONAL SYMPOSIUM ON PERSONAL, INDOOR AND MOBILE RADIO COMMUNICATIONS PAVILHÃO ATLÂNTICO, LISBOA, PORTUGAL SEPTEMBER 15-18, 2002

Instructions for Posters Presenters

Dear Colleague

We are very grateful to you for having submitted a paper to PIMRC'2002, which purpose is to share ideas and stimulate new developments in mobile and wireless communications. As a poster presenter, you have the responsibility of capturing the interest of the attendees to the work you are showing. The quality of your presentation directly affects the interest your audience will have in your material and the overall satisfaction the community will have in the conference.

We would like to call your attention to the following:

- Each poster board is marked with the assigned poster reference number. Authors are required to use only the boards corresponding to their posters.
- Posters should be put on the board 15 minutes before the beginning of the posters session.
- Posters should be glued to the poster board using only dual-face gluing tape supplied by the local organization. Staples, pins, screws or any abrasive or perforating hardware are not permitted. Do not write or paint on the poster boards.
- There will be student volunteers in the room to ensure that facilities are functioning properly, and to give you any assistance you may require during the session.
- Authors are required to stand by their posters during the whole posters session, and to remove their posters from the boards immediately after the end of the posters session.
- Maximum overall dimensions for the poster are 90 cm \times 110 cm (width \times height).
- Use an appropriate font size allowing posters to be readable by delegates 1.5 m away. The poster message should be clear and understandable without oral explanation. A recommended format is given in the following page.

Thank you again. If you need any more information, please do not hesitate to ask us.

Sincerely,

The Organising Committee.
